SUMMARY

AI & Data Engineer with 3+ years of experience building production-ready AI applications, agentic workflows, scalable data platforms, and cloud-native analytics solutions. Experienced in LangGraph, RAG, AWS Bedrock, vector databases, Python, and workflow automation, delivering enterprise AI systems and operational intelligence solutions.

EXPERIENCE

Calsoft

Jan 2026 – Present

AI Data Engineer

- Developed AI agents using LangGraph, OpenAI, Claude, and open-source LLMs to automate enterprise workflow execution and decision-support processes.
- Developed multi-agent AI systems leveraging RAG, Text-to-SQL, vector search, and human-in-the-loop validation for airline and enterprise operations.
- Automated business processes through Python, LLM APIs, AWS services, and workflow orchestration, reducing manual effort.
- Implemented AI observability, prompt versioning, evaluation pipelines, guardrails, and structured outputs to improve reliability and reduce response failures.
- Partnered with stakeholders to deliver scalable AI automation solutions using Claude Code, OpenCode, Cursor, and GitHub Copilot.

Community Dreams Foundation, Remote

May 2025 – Jan 2026

Data Engineer

- Engineered AWS-based ETL pipelines using Python, SQL, and Airflow to centralize multi-source operational data.
- Designed normalized data models improving reporting consistency and downstream analytics readiness.
- BDelivered executive-facing dashboards using Power BI, Tableau, and AWS QuickSight, enabling real-time operational visibility and KPI tracking.
- Applied ML workflows on AWS SageMaker to identify bottlenecks and optimize resource allocation.
- Automated data validation and monitoring processes to improve reliability and reporting accuracy.

Texas Tech University Health Sciences Center

Oct 2023 – May 2025

Data AI Research Assistant

- Automated KPI reporting pipelines integrating Zoom and ServiceNow APIs, reducing manual effort by 40%.
- Developed ETL workflows using Apache Airflow for operational analytics and reporting datasets.
- Developed machine learning and LLM-powered classification models to analyze service interactions and generate operational insights.
- Performed feature engineering and workflow analysis to identify operational bottlenecks.
- Built Power BI, Tableau, and QuickSight dashboards improving reporting visibility and stakeholder decisions.

Accenture, Hyderabad, India

Jul 2021 – Aug 2023

Data Engineer

- Optimized Oracle and Snowflake data platforms through schema design, performance tuning, and scalable analytics architecture.
- Automated PL/SQL and Python ETL workflows reducing manual intervention by 40%.
- Developed scalable ingestion pipelines integrating API and forecasting datasets.
- Built Power BI, Tableau, and monitoring dashboards for operational reporting and analytics.
- Supported ASCP planning workflows through ML-driven optimization and demand forecasting.

PROJECTS

my projects available at:github.com/ManasaChepuri

AI Agent Automation Platform

- Built a production-ready multi-agent platform using LangGraph, OpenAI, Claude, FastAPI, and vector databases supporting planning, retrieval, tool usage, and human approval workflows..
- Designed agent orchestration pipelines supporting task delegation, retrieval, planning, and human approval checkpoints.

Finance RAG Copilot

- Built an end-to-end RAG system using AWS Bedrock, FastAPI, pgvector, and Streamlit to enable natural language querying of financial datasets.
- Implemented semantic search, retrieval evaluation, and source-grounded responses to deliver executive-ready insights.

EDUCATION

Texas Tech University, Lubbock, TX

Aug 2023 – May 2025

Master of Science in Computer Science

SKILLS

AI & Agents: OpenAI API, Claude API, Gemini API, LangGraph, LangChain, RAG, Multi-Agent Systems, Prompt Engineering, MCP, Function Calling, Agent Evaluation, Langfuse, FAISS, Chroma, pgvector

Dashboards & Reporting: Power BI, Tableau, AWS QuickSight, KPI Dashboards, Reporting Automation, Data Visualization, Executive Reporting

Automation & Development: Python, FastAPI, REST APIs, Workflow Automation, Airflow, Git, Linux, Docker, Kubernetes, Claude Code, OpenCode, Cursor, GitHub Copilot

Cloud & Data: AWS Glue, Lambda, S3, Athena, Redshift, SageMaker, ECS, EC2, API Gateway, CloudWatch, GCP, PySpark, Spark, Kafka, Hadoop, Hive, SQL

Databases: PostgreSQL, Oracle, Snowflake, MongoDB, DynamoDB, Redis, BigQuery

CERTIFICATIONS

AWS Fundamentals • OCI Generative AI Professional • Google Data Analytics • IBM Data Science • Power BI
